

*Enjoy your music  
as never before*

*Lyritech*  
loudspeakers  
**FULLRANGE**

A line of speakers with very peculiar characteristics.

## Introduction

**A full-range drive unit consists of a single driver element used to move and control a diaphragm. Often the cone structure includes optimizations to enhance high-frequency performance.**

With fullrange drivers, perfectly assembled, we have achieved a high level of sound quality at all frequencies, and high-performance dBs sensitivity.
